Before installation, it is compulsory to read the NC 9EX „ORIGINAL INSTRUCTIONS 2/3 Installation and user manual”.

1. Connect the side guide rails to the awning cassette.
2. Place the awning in the window opening.
3. Check the correctness of the awning installation.
4. Screw the awning to the window or to the lining.
5. Place plugs in the guide rails openings.
6. Connect the awning to the network using the 15VDC power supply.
7. Operate the awning using remote control or buttons on the awning.
8. If required, adjust the end positions of the awning.

In case of any doubt, please contact the manufacturer or a certified professional.
